CERTIFICATE

This is to certify that Sunitha, a student of B.Sc. (2nd Semester), has successfully participated in a one-day field visit to Chandrampalli Dam and Ghottam Ghotta Sanctuary Chincholi on [18-05-2024]. This visit was organized by the Department of Botany, [Nrupatunga Arts, Commerce, And Science Degree college Sedam], as part of the academic curriculum.

During this visit, Sunitha actively engaged in fieldwork and demonstrated a keen interest in studying the diverse flora of the region. The hands-on experience gained through this excursion has significantly contributed to her practical understanding of Botanical sciences.

Acknowledgement

I wish to express my sincere gratitude to all those who contributed to the success of the field trip, making it not only possible but also a highly enriching and unforgettable experience.

Foremost, I extend my deepest appreciation to the Department of Botany, principle ⁱⁿ and all other teachers, whose meticulous planning and organization ensured a smooth and educational tour.

I am also thankful to 'Nrupatunga Degree College' for sponsoring this tour. Their companionship and their support underscores a commitment to practical learning experiences and professional development, for which I am profoundly thankful.

Chandrampalli Dam

Chirchali lies in the Kalaburagi district and is most popular for the 'Chandrampalli Dam'. It is built across river Bherna and is situated in Chandrampalli village. Built in 1973, it has six spillway gates.

Since it is located between two mountains with the Gottam Gota forest in the background, it is bestowed with abundant natural beauty.

Chandrampalli dam, along with four smaller dams provide water to habitats of this wildlife sanctuary.

The dam was constructed during 1973, and has been providing irrigation facilities to many villages of chincholi taluka. The dam is defined an earthen Dam with left bank spillway. Since it was constructed to serve as an migration project. It has been termed as single purpose dam.

The Gotta forest envelops the dam on all sides. An island on the Dam has become a popular destination for sightseers. The length of the Dam is 936 metres, and its height is 28.65 metres.

There are wide range of activities made available to tourist who visit the dam. The dam lies near the thick cover of forests. This has become the main reason why trekking and camping have emerged as an attraction to the region.

The dam was full of peace and we felt very relaxed after viewing the view of the chandrapalli dam, The greenery, deep water, the water falling from the gateway that sounds just like 'ahh' completely relaxing.

We all enjoyed the mountain view and dam view which made us laugh with our inner heart beauty. The peace has stolen our heart, and with all coolness we all created many memories together. Also we found a peak of view, which was a cute place and there where some small tiny cool resort which made us to capture the glory and beauty of it's own and we captured many memorable photos which were saved in our gallery.

Gottam Gutta

Gottam Gutta or Gottam Gota is located in the chincholi taluk of kalaburagi district

Gottam Gutta forest is covered by lush green forests and the best time to visit this place is during monsoon. The forest and is less explored by travellers and hence, remains a virgin beauty and a perfect place to hang-out for those who love offbeat travelling.

People looking for adventure and nature lovers can relax at the picture **Gottam Gutta**, located on the telangana karnataka border, surrounded by forests and eddies of the chandrapally dam on the Bhima River in karnataka. The Gottam Gutta Forest is an incredible option for camping and trekking enthusiasts.

#Thebeautyofnature.

at the Entry to

Gottam Gutta there was

a security room which

was completely surrounded

by colourful flowers which

made me and my fellow buddy

to prepare a cute bracelet with flowers. as it's on the

above picture, it was something and for the first time

in my life. I have experienced it, which was really

loving. also we found ~~money~~ monkey's there like how

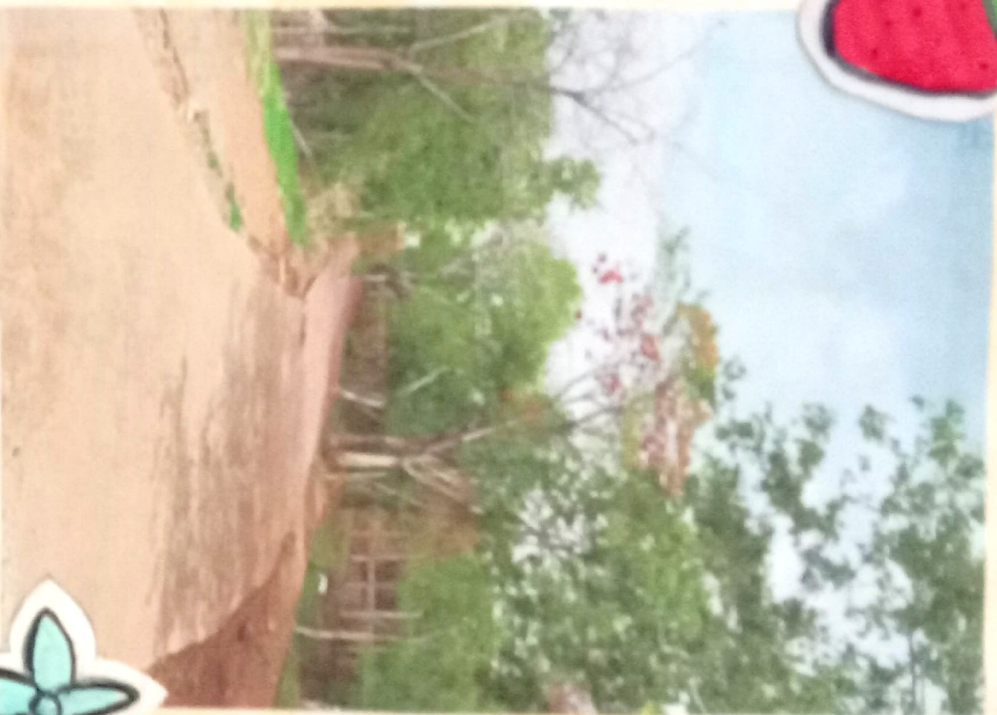

people used to walk on streets, there it was monkey's

Zone. ~~they~~ used to grab things and food items

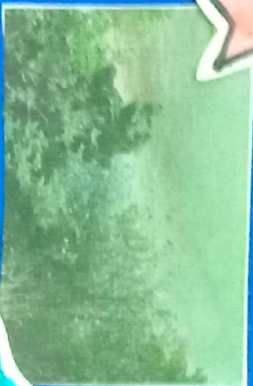

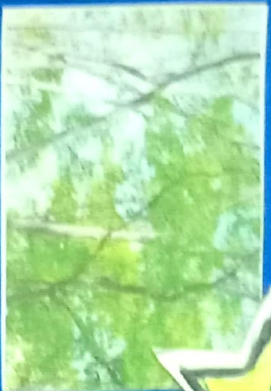

from the visitors, it's all because there's an anti

-ent Hanuman temple.

Exiting front of the temple we found this peaceful snap
the pathway was peaceful and has it's own beauty.
Just beside the temple we started experiencing our
trekking. trekking was joyful but we have to be secure,
from first step to last step we find many new things,
incredible view, greenery, sounds of animals and birds
even the sound of crushing dried leaves. Really it was
memorable and best tourist place for our field tour.
after getting down we saw flow of water. we all
played alot had fun and made memories..!

There where huge
green trees and the
Rocks where ununilbor
mally started all

over the forest and also found many cattles
having their meal in the forest as it's
mentioned in above pictures. while going
we're excited and with all energy and joy
we reached the final point but as we just moved
from there to climb up to go back. there we all
missed ~~go~~ our parents. In everyone mouth all were
just murmuring Mamma... Mummy... Yappa... Yappa...
which was really healing at that time legs
where like hell, but though we all enjoyed
our field tour, trekking, memories and
Everything. and mainly our mind got filled
with that tour...!!!

collage of memories!

#Vibes of
togetherness

**THANK
YOU**
